CALIBEX®

3D Laser Calibration Technology

Safely calibrating fuel tanks with high accuracy, even with fuel inside, in 30 min.

CalibeX® 3D Laser Calibration Technology

3D CalibeX® is one of the most comprehensive technological projects developed by ASIS. CalibeX® is a system composed of advanced robot mechanics, mechatronics, state-of-the-art electronic circuit design, on-board LEL device design, laser and optical applications, etc. and applications consisting of 3D modeling algorithms and data analysis software involving advanced mathematics.

CalibeX® have more advantages from any other calibration method used.

One of the most important features of the system is its capability of completing the calibration processes within a short time, in 30 minutes, by installing CalibeX® into any hole on tank.

All internal dimensions of the underground tanks, tank volume, tank length, inclination angle, dome shape and lengths are determined. Then, ASIS engineers create Calibration Table based on these data and 3D mathematical model.

System Basics

- ▶ One tank can be calibrated within 30 minutes
- ▶ Usable in all cylindrical-horizontal tanks
- ▶ Calculates diameter, length, inclination, dome shape and dome length
- ▶ Does not require tank to be empty
- ▶ Does not require external power
- ▶ It generates highly accurate calibration table
- ▶ It is very reliable and easy to use system
- ▶ Can be easily carried and installed
- ▶ Calibration process does not cause downtime
- ▶ Application of the system fully meets OHSE (Occupational Health, Safety and Environment)
- ▶ It is reliable and ATEX certified
- ▶ Worldwide patented product of ASIS

Security and Safety

All system components are designed and certified according to international safety regulations.

First in The World

Technical Specifications

- | | |
|--|--|
| ▶ Measurement* accuracy in volume $\pm 0,5\%$ | ▶ Measurement range: ~ 10 m |
| ▶ Measurement* accuracy in distance $\pm 0,1\%$ | ▶ Minimum entry hole: 2" |
| ▶ Measurement* accuracy in inclination $\pm 0,1^\circ$ | ▶ Scanning tank: ~ 30 min |
| | ▶ IP protection: IP54 |
| | ▶ Protection Class: ATEX |
| | ▶ CalibeX dimensions: 75x15x15 cm, 6kg |
| | ▶ CalibeX set dimensions: 100x40x40 cm, 30kg |
| | ▶ Power supply: 14.8 V (Built-in battery pack) |
